MEMORANDUM FOR: Director, National Photographic Interpretation  
Center  
Director, Office of Medical Services  
Director, Office of Technical Services  
Director, Office of Communications  
Director, Office of Logistics

STAT FROM:   
Chief, Safety Staff, DDA  
SUBJECT: Disposal of Chemical Wastes

1. The Safety Staff is currently gathering estimates on the amount of chemical wastes generated at various Agency facilities that are classified by EPA as hazardous. For your review, attached is Appendix VIII - Hazardous Constituents, from current EPA Regulations on Identification and Listing of Hazardous Waste (40 CFR 261). Table 261.31 lists hazardous waste from nonspecific sources and Table 261.32 lists hazardous wastes from specific sources.

2. In order to accurately determine the amount of waste to be disposed of, it is requested that the following information be provided to the Safety Staff to assist in establishing quantitative estimates:

a. By-products of chemicals classified by EPA as hazardous wastes:

- (1) Process by which waste is generated.
- (2) Quantity of wastes produced (liquid or solid)
- (3) Classification of wastes (flammable liquids and solids, corrosives, poisons, oxidizers).
- (4) Present method of disposal, if any.

b. Chemicals in Stock/No Longer in Use:

- (1) Product and trade name
- (2) Quantity (liquid or solid)
- (3) Classification (flammable liquids and solids, corrosives, poisons, oxidizers).

3. Attachment B is a form designed by this office for use in comprising the requested information. Your cooperation in this matter will assist us in establishing procedures to legally and safely dispose of chemical wastes through certified transportation. Please contact   
 if further information is required.
